Addressing Complex Behaviors: Supporting Neurodiversity: Utilizing FASCETS Neurobehavioral Model

Name:

Email:

Phone:

Organization:

The Alaska Center for Fetal Alcohol Spectrum Disorders (FASD) is sponsoring this training with generous support from the Alaska Center for Resource Families (ACRF). Trainings are at no cost and will be offered in Anchorage, Juneau, and Fairbanks, with trainers Jenn Wagaman and Tami Eller. Read more about the trainers on page 2. Training locations and other details will be announced upon registration. Lunch is included. Unfortunately, there are no scholarship funds.

Please check which training you want to attend:

Anchorage: Sat-Sun, January 18-19, 2025 (9am-4pm)

Juneau: Fri-Sat, February 14-15, 2025 (9am-4pm)

Fairbanks: Sat-Sun, March 1-2, 2025 (9am-4pm)

About the Training:

Complex behaviors encompass a spectrum of brain-based conditions with a wide range of neurobehavioral symptoms. Using the FASCETS Neurobehavioral Model to address complex behaviors provides a common language for participants to enhance ongoing collaboration and networking among those living and working with people with Fetal Alcohol Spectrum Disorders (FASD) and other neurodevelopmental disorders in all systems.

This training links brain function with everyday behaviors and introduces an evidence-based emerging best practices approach to developing appropriate and effective person-specific strategies in all settings. Participants in past trainings have included parents and caregivers, teachers, nurses, physicians, attorneys, mental health and addictions professionals, psychologists, social workers, corrections professionals, employers, and people with FASD.

Please check all the boxes that apply to you:

Person with Prenatal Alcohol Exposure/Fetal Alcohol Spectrum Disorder (PAE/FASD)

Family member or caregiver of a person with PAE/FASD

Service provider serving people with PAE/FASD

Medical Professional

Educator

Addressing Complex Behaviors: Supporting Neurodiversity: Utilizing FASCETS Neurobehavioral Model

About the Trainers

Jenn Wagaman has served as a trainer, educator, parent and advocate in the field of FASD for nearly 20 years. She served as the Fetal Alcohol Spectrum Disorders Diagnostic Team coordinator at the Alaska Center for Children and Adults in Fairbanks from 2011 to 2022. Prior to her time as coordinator, she worked on the team as a Parent Navigator. Wagaman has written, developed, and teaches a class for the University of Alaska Fairbanks, "FASD: Diagnosis, Intervention and Strategies," which is offered to students across the state of Alaska. She is a state-certified FASD trainer and a certified parent/caregiver trainer, has run a caregiver support group for families caring for children with FASD and provides trainings across Alaska. She currently serves as a communications professional and adjunct faculty member at the University of Alaska Fairbanks.

Tami Eller, M.S. was born and raised in Anchorage. She received her Master of Science in Counseling Psychology from Alaska Pacific University and has been a Facilitator of the FASCETS Neurobehavioral Model since 2009. She comes to this work with over 20 years of experience providing services to children and families impacted by neurobehavioral differences and complex trauma. Eller's passion is educating providers and advocating for individuals affected by FASD and their families. She co-chaired the workgroup that developed the 9 Core Messages: What Everyone Should Know about Prenatal Alcohol Exposure. Tami has provided training in Alaska, the lower 48, and Australia.
